TRAINING ...

HANDS-ON, PROCESS-ORIENTED AND TAILOR-MADE

All training to high standards ISO 21001 and ISO 29993

A successful contamination control strategy depends significantly on well-trained personnel. Regular retraining is also needed to reinforce good practices and keep them up-to-date. Comprehensive training programmes and employee trainings have been designed to achieve this for all levels of competency across your business.

Hands-on, process-oriented, tailor-made – training goals and exact needs are defined in advance, and each curriculum is individually adapted to your processes.

Our programmes motivate employees to go beyond mere compliance by imparting a deep understanding of the underlying logic behind procedures. Your team will be motivated and sustainably equipped to handle whatever comes their way.

LEVELS & TARGET GROUPS

- » Individual Operator Training
- » Workshops for Quality Oversight
- » Certification Program
Cleanroom Expert
- » Applied GMP-Workshops

CLEANROOM SERVICES ... FOR ALL CLASSIFICATIONS

Competence and high awareness count when it comes to cleaning, decontamination, or disinfection of cleanrooms and especially process equipment. Highly qualified and experienced comprei employees decontaminate over 200 cleanrooms and machines every day. These include pharmaceutical and micro-technical systems (EU-GMP, ISO14644). All cleaning steps are carried out in accordance with documentation to SOP.

Process analysis and risk assessment are undertaken with the customer to make any needed adjustments to the cleaning pro-

cesses to ensure quality improvement. Should your premises require unscheduled or short-term special cleaning, we can guarantee the prompt deployment of a comprei team.

OUR SOLUTIONS FOR YOU

- » Material transfer contamination control
- » Cleanroom preparation for qualification
- » Machine and systems cleaning – a specialised field requiring high level technical understanding
- » Maintenance cleaning
