Client feedback on comprei training

"Thank you very much, you made a dry topic easy to understand and actually fun. Everyone enjoyed the session!"

"The comprei training is excellently suited to reinforce the aseptic work of our cleanroom operators."

"I think there's no better offer for such a highly specialized training at such a high level."

LEARNING SOLUTIONS

For strong players in the cleanroom

Contamination-critical high-tech industries face the challenge of maintaining awareness for proper movement and actions in the cleanroom environment at the highest level every day.

The successful and continuous implementation of a Contamination Control

Strategy (CCS) depends significantly on well-trained individuals who are regularly sensitized.

This is where comprei's learning solutions come in. As customized services, they are characterized by:

- » **Process-oriented training aligned with operational workflows**
- » **Personalized learning goals with real-world relevance**
- » **Powerful visual tools and simulations to deepen understanding**

comprei's approach goes beyond check-lists and compliance. We help learners understand the "why" behind every rule – empowering them to act responsibly, safely, and with confidence in ultra-clean environments.

Top-Tier learning experience:
Nearly 12,000 participants have rated our trainings with top marks.

THREE PLAY MODES

Choose what fits your needs

1 Continuous learning support

Brief and low-threshold digital impulses introduce learners to the topic. In classroom training, newcomers and experienced individuals start with a more **homogeneous level of knowledge** – a solid basis to build on. Further learning impulses after face-to-face training reinforce **anchoring** and **learning transfer** into routine.

2 Classroom training on-site or at the comprei training center

- » Process-specific customization of learning content
- » Impactful visualization including the comprei Cleanroom Cube
- » Hands-on practice in small groups

3 Live online training or webinar

- » Ideal for refreshing theory-based topics
- » High efficiency – minimal time investment

Topics and learning objectives

Blended learning

- » Repeated learning impulses – playful, digital, and effective
- » Practical training, simulation, and reflection in person
- » Progress tracking and gap analysis
- » Flexible customization of learning content

CERTIFICATIONS

ISO 29993 and ISO 21001

The modern world of standardization clearly distinguishes between service standards and management system standards, which are structured according to the “High Level Structure” of ISO. In the field of service standards, **ISO 29993:2017** defines **requirements for learning services outside formal education**, ensuring clear quality standards.

To cover the management system approach of ISO 29990, **ISO 21001:2018** was published in 2018. This standard defines requirements for **management systems for educational organizations** and helps to systematically plan, implement, and continuously improve educational offerings.

comprei has embraced both standards since their release and successfully renewed certification in late 2024.

“The central benefit for learners and sponsors lies in the reliability. The standard ensures that up-to-date knowledge, skills, and abilities are conveyed for the best possible learning transfer using efficient forms, methodology, and didactics.”

Mag. (FH) Hermann Zeilinger, Lead Auditor TÜV AUSTRIA CERT GMBH

THE CLEANROOM CUBE

Your booster for sustainable learning transfer into routine

Training where you are – our mobile option!

Experience cleanroom practices up close: our mobile unit allows for hands-on simulation and visualization of particle behavior and airflow, creating lasting awareness through real-life interaction.

Stay up to date – with the comprei newsletter.

Subscribe to our newsletter and stay current with the latest in cleanroom standards and practices – directly in your inbox.
